FRIDAY — FEBRUARY 10, 1956

CONGRATULATIONS DON

We would like to congratulate Don Buxton, fifteen year
old son of Mr. and Mrs. Duane Buxton, on winning
the highest award of scouting, the Eagle Badge.

Although we hardly got beyond the Tenderfoot stage
ourselves, we got enough from scouting to understand
how much work is involved in obtaining the high rank
of Eagle Scout.

Don's attainment in the field of scouting, is certainly
reflection of his own character and integrity. His
teaching this goal places honor on his father and his
mother, who we feel sure, were instrumental in his mak-
ing the grade.

Knowing Don as we do, we know that he feels that
he has honored his parents by becoming an Eagle Scout,
as well as himself. Most parents feel honored when their
children are honored.

We think it highly appropriate that Don received his
Eagle Badge last week, boy scout week. The scouts are
observing their 50th anniversary.

Don is on the God and Country award which
further attests to his excellent character.

We will watch this young man as he grows up, and
we feel free in predicting that he will have a successful
life. He will be able to draw on his sharpened resource-
fulness, his expanded ability, his practiced independence,
and a stronger faith in God.

10 Years Ago This Week

Ledger and Times File
February 1946

Congratulations to Mr. and Mrs. James Johnson,
Murray, on the birth of a son, born February 1.

The college farm owned by Murray State College
has sold its dark field tobacco crop for the highest aver-
age price ever received in the history of the farm, Prof.
A. Carman, head of the Agricultural Department, an-
nounced. The crop of 9,010 pounds sold for \$2,995.21.
Averaging \$33.24.

Thomas Nix, 31, younger son of Mr. and Mrs. T. C.
Nix, formerly of this county, died at his home in Cincin-
nati, Tuesday morning. Death resulted from complications
that followed an operation several months ago.

Besides his wife and child, he is survived by his par-
ents.

Jim F. Adams has purchased the business at Midway
formerly owned by Joe Bruce Wilson. The firm is now
known as Adams Grocery.

Mrs. Charlie Smith, 85, died Saturday morning at
her home here.

Mrs. Smith's husband, who survives her, organized
the Murray Wholesale Grocery Company in 1923. They
had been married 61 years.

Miss Frances Sexton went to McKenzie, Tenn., yester-
day where she will join friends for a short stay in
Memphis.

NICE? YES, BUT--

EUROPE'S COLDEST WINTER in decades put this white blanket on
tropical verdure in Nice, French Riviera city. (International)

New Dodge Sport Model Announced

New, high performance Dodge
"D-500" sports models were an-
nounced today by Taylor Motor
Co., Dodge dealer here. The new
"D-500" models feature a 260
horsepower engine, 12-inch brakes,
and a lowered chassis with a sport
type suspension. These models are
in current production and several
hundred have been built.

The "D-500" models are regularly
available in three body types, the
Coronet two-door sedan, Custom
Royal two-door sedan, and Custom
Royal convertible. However,
on special order other body styles
may be obtained. "At Bonneville,"
Taylor Motor Co. said, "with our
regular production four-door family
sedan, we returned to America
most of the records that had pre-
viously been held by expensive
foreign sports models. However,
there are some people who want
even greater acceleration and per-
formance. We believe that the
Dodge "D-500" models are the
answer to their wishes."

The engine is of the double
rocker arm, hemispheric combus-
tion type, and boasts a compres-
sion ratio of 9.25 to 1. The air
cleaner is of the low restriction
type, and the four barrel carbure-
tor has been modified with larger
venturi. The intake manifold has
an enlarged throttle bore. The
engine displacement is 315 cubic
inches.

A choice of two transmissions is
available. One with 232 degree in-
take, 232 degree exhaust and 30
degree overlap maximum torque
throughout the speed range, with
little or no loss at high speeds.
This, the engineers are quick to
point out, is accomplished by em-
ploying more rapid opening of the
valves. A second camshaft with
200 degree intake, 270 degree ex-
haust and 90 degree overlap, is
available for maximum high speed
operation.

The 12-volt electrical system
features a double breaker distri-
butor, with ballast coil, and short
reach, special heat range spark
plugs.

The entire chassis has been
lowered one and one-half inches
to provide a lower center of gravi-
ty. Heavy duty springs and shock
absorbers are employed, as well
as 12" heavy duty brakes.

The suspension system has been
modified to provide greater rigidi-
ty when cornering, as in essential
for a maximum performance
vehicle of this type.

A complete range of axle ratios
will be available for use on these
models.

James Seay Makes Talk Before Future Homemakers

Mr. James Seay, hairstylist from
Jean's Beauty Shoppe, gave an
interesting, informative lecture
demonstration to the Murray High
Future Homemakers of America
January 24, 1956.

Mr. Seay effectively presented to
the girls many tips on good groom-
ing including: care of the skin,
applying makeup correctly, care
of the hands and nails, caring for
the hair and styling for each
shape of the face. He said the
best change their hair style to
better frame their face.

Mr. Seay showed attractive pic-
tures to emphasize each phase
of good grooming he discussed,
and answered many questions
asked by the girls. He demon-
strated on several girls ways they
could change their hair style to
better frame their face.

Twenty-five members were
present and their adviser, Mrs. Gob
Gast.

The meeting was adjourned by
the FHA president, Joretta Fox.

A pot plant was sent to Mr.
Seay as a token of appreciation
from the club.

Highway Bond May Include Medical Too

By THOMAS E. GISH

United Press Staff Correspondent
FRANKFORT, Ky., Jan. 24. — Gov. A. B.
Chandler indicated his proposed
highway bond issue may also in-
clude funds for a medical school
for the University of Kentucky
and for construction of "some"
high schools.

At the same time, Chandler an-
nounced he has changed the order
of his four proposed special leg-
islative sessions.

He said the first session, sched-
uled to start Feb. 23, will deal
with reorganization of the govern-
ment. Then will come sessions deal-
ing with highways and the bond
issue, the state budget, and taxes.

Originally, the highway session
was scheduled first, to be follow-
ed by reorganization, budget and
taxes.

Chandler did not say directly
that he would request a bond
issue for school purposes, but hint-
ed that he would do so. The hint
came in the fact that he said the
special session for a highway bond
issue may also include action on
the medical school and some high
schools.

Chandler said last week he
planned a bond issue of up to 200
million dollars for highway con-
struction, with the money to be
used to match federal funds ex-
pected to be available under Pres-
ident Eisenhower's road program.

Under the President's plan, the
federal government would put up
nine dollars for each state dollar,
so that Kentucky potentially could
end up with two billion dollars for
highway construction over a 10-
year period.

The proposed medical school
would cost an estimated 15 million
dollars for construction and equip-
ment. Chandler has publicly com-

mitted himself to the school, but
so far has made no request for
legislative action.

It seemed likely that Chandler's
remarks concerning high school
construction referred to the need
for state funds to match federal
dollars to be available under the
President's school construction pro-
gram.

FRIDAY — FEBRUARY 10, 1956

MURRAY TRAINING SCHOOL

By Barbara Jo Wraether

The Murray Training School held
its fourth monthly meeting Friday,
February 4. The meeting was held
in the assembly room of the
Training school.

The meeting was called to order
by President Judy Grogan.
Devotion was read from Matthew
23: 13-30 by Susan Evans. Pledge
to the American Flag was led
by Carolyn Wood and the 4-H
pledge was led by Mr. Bless.

Roll was called by Brenda
Wilson and was answered by

members of the school, but
so far has made no request for
legislative action.

It seemed likely that Chandler's
remarks concerning high school
construction referred to the need
for state funds to match federal
dollars to be available under the
President's school construction pro-
gram.

Chandler did not say directly
that he would request a bond
issue for school purposes, but hint-
ed that he would do so. The hint
came in the fact that he said the
special session for a highway bond
issue may also include action on
the medical school and some high
schools.

Toothbrush Effective Weapon

(This is the fourth in a series of six articles on dental health being presented by the Ledger and Times, in cooperation with the Murray Dental Society, as part of the 1956 observance of National Children's Dental Health Week, Feb. 6-11.)

A child should be started along the road to good dental health habits by the time he is three.

Tooth decay, or dental caries as it is properly called, starts at an early age and spreads rapidly. Fifty per cent of all children have at least one decayed tooth by the time they celebrate their second birthday.

Treated promptly enough, the damage can be repaired with a minimum of discomfort, time and expense. Left untreated, the decayed area may spread, causing extensive damage, pain and possibly loss of the tooth. Other teeth will be attacked by decay and the eventual result will be a mouth crippled by dental caries.

But, some parents think, the tooth is going to come out anyway, so why go to the trouble of having it filled?

Aside from the fact that a toothache in a first or "baby" tooth can be just as painful as an ache in a permanent tooth, it is important for the child's health to maintain those first teeth in good condition until the second set erupts.

In addition to the obvious func-

tion of chewing, the first teeth are necessary for clear speech; for giving form and symmetry to the face; for guiding into the mouth the permanent teeth which are forming beneath them, and for general health as well.

There are 20 teeth in this first set. They begin to erupt at about the age of seven months, but the tooth buds actually start to form in the jaws some three or four months before birth.

About the time the child is entering first grade, at the age of six, the second or permanent set of teeth begins to appear.

The roots of the first teeth, meanwhile, are dissolving so that these "baby" teeth will be shed easily. At the same time, growth of the jaws speeds up, creating spaces between the first teeth

in order to make room for the larger permanent teeth. When the child is about the age of 12, all of the permanent teeth except the third molar will have erupted and the child's mouth will have grown almost to adult size.

Probably the most important tooth in the child's mouth is the first permanent molar which erupts at age six. It is the keystone which determines the eventual position of the other permanent teeth in the dental arch. Since it does not replace a first tooth, it is often mistaken for one of the "baby" teeth.

Loss of the six-year molar, or a serious shifting in its position because of premature loss of nearby first teeth, can have disastrous effects on the entire set of permanent teeth.

Miss Thevathan And James D. McCuiston Married Recently

Announcement has been made of the marriage of Miss Hilda Gray Trevathan, daughter of Mr. and Mrs. Gaylon Trevathan, to James Dele McCuiston, son of Mr. and Mrs. Frank McCuiston.

The ceremony was read on Friday, February 3, with the bride's sister, Miss Charlotte Trevathan, and brother, James Trevathan, being the attendants.

For her wedding the bride wore a blue dress with black accessories. Miss Trevathan was attended in a black dress with black accessories.

Mrs. McCuiston is a graduate of Murray Training School and attended Murray State College. She now has a position in the office of the Murray Hospital.

Mr. McCuiston attended Murray High School and is now associated with his father in the business, McCuiston Auto Electric Service.

Over 140 Countries To Observe World Day Of Prayer

The United Church Women of Murray will observe the World Day of Prayer on Friday, February 17, at two o'clock in the afternoon at the First Methodist Church. Mrs. Harry Sparks will be the speaker.

On that day a world wide chain of prayer of Christian men, women, and children in one hundred and forty different countries will be observed. This will be six more years than observed this special day in 1955.

The first service will be held at sundown in the Fiji and Tonga Islands in the Pacific. They will continue until the setting of the sun closing with the service on the St. Lawrence Island, Alaska.

Miss Norma Senter, president of the Murray U.C.W., urged all women of Murray and Calhoun County to attend this meeting.

Special Program To Be Held By U.C.W.

The observance of the World Day of Prayer is being promoted by the United Church Women of Murray with the special service to be held at the First Methodist Church on Friday, February 17, at two o'clock in the afternoon.

This special observance began in 1901 when Presbyterian women set a day of prayer for home missions. According to reports two years later the Baptists appointed a day of prayer for foreign missions.

By 1919 all denominations of the United States were keeping the first Friday in Lent as a day of prayer for world missions, according to reports. There are now twenty thousand services in the United States alone.

"God Save America" was the theme of the program presented with Mrs. Purdon Outland in charge. The opening song was "Rescue the Perishing" led by Mrs. Porter Holland with Mrs. Harry Haysinger at the piano.

Mrs. Cordie Caldwell read the scripture leading followed by prayer by Mrs. A. W. Russell. Others taking part in the program were Mrs. Edgar Searcy, Mrs. J. A. Shuler, Mrs. G. D. Jones and Mrs. Outland.

A special film on "Home Missions" was shown by Mrs. Castle Parker with Mrs. Allen McCoy as narrator.

The chairman, Mrs. McCoy, presided at the meeting. Mrs. James Ward, secretary-treasurer.

Refreshments were served by the hostesses, Mrs. Sexton and Mrs. Russell, to the twelve members and one visitor, Mrs. Howell Thurman.

Mrs. Mary Brown Is Hostess For Jessie Ludwick Circle

The home of Mrs. B. F. Scherffus on North Sixteenth Street was the scene of the meeting of the Jessie Ludwick Circle of the Woman's Association of the College Presbyterian Church.

Mrs. Mary Brown was the hostess for the meeting held on Tuesday, February 7, at two-thirty o'clock in the afternoon.

The program was presented by Mrs. B. F. Scherffus. Her subject was "Yield Attitudes Are Shaping" which was given in a very capable way.

Mrs. Charlie Crawford gave the devotion from the first chapter of Ephesians. The chairman, Mrs. Scherffus, led the opening prayer. The meeting was closed with the Mizpah benediction.

During the social hour refreshments were served by the hostesses to the eight members present.

HUSBAND AWARDED \$250 ALIMONY

WOJCIECHOWICZ STANLEY WOJKIEWICZ, 39, husband of Hollywood columnist Sheila Graham (right), is shown in court at Santa Monica, Calif., where he was awarded \$250 a month temporary alimony.

Household Hints

To remove paint from a roller, place it in a glass jar with the proper solvent for the paint you've been using. Shake the solvent through the roller, then roll it out on new papers to remove the liquid. After all the paint is out, wash the roller in warm suds, rinse and dry.

To keep pastel-colored curtains from fading in the sunlight, dry them inside a large pillow case.

Cora Graves Circle Has Meet At Home Of Mrs. Earl Dye

Mrs. Earl Dye opened her home for the meeting of the Cora Graves Circle of the Woman's Association of the College Presbyterian Church held Monday, February 6, at eight o'clock in the evening.

The speaker for the evening was Capt. Earl Dye who gave a most beautifully organized and a challenging talk on the theme, "Christian Living."

Mrs. Jack Belote gave the devotion. Mrs. Karl Warming, chairman, presided at the meeting.

The hostess served refreshments to those present.

CAPITOL SAT. ONLY! MARK STEVENS Jack Slade DOROTHY MALONE PLUS SERIAL and CARTOON

COLLEGE CHURCH, IS A YOUNG CHURCH

Established After Several Years Of Trial; Successful In 1952

(Ed. Note: The following article about the history of the College Church of Christ was taken from the church files, and was written by the minister, Ernest Clevenger, Jr.)

Around the year 1943 the need for a congregation of the Lord's body which would meet near the Murray State College campus was recognized by Christians in Western Kentucky, especially those of Murray and Calloway County. During the course of the next few years several attempts were made to commence such an effort, but they were unsuccessful. In 1952 another attempt was begun to establish the church near the College, this time in order to relieve the over-crowded conditions of the 7th and Poplar Street church. The church, which had purchased the property, appointed Vernon Anderson, W. H. Brooks and Esco Gunter to make the necessary arrangements, together with other members of the congregation, to establish the new work. The lot upon which the frame house was situated measured 100 feet frontage by 138 feet depth. Preparation was made in July, 1953 to begin remodeling the frame dwelling to serve as a temporary meetinghouse.

Several partitions were removed from the dwelling which provided a seating capacity for approximately 150 people. Space was also provided for 5 class rooms and a minister's study, which also served as a class room. Folding chairs were used in the auditorium and

by the college students in the basement of the Library building on the campus. These services had been started several years before by gospel preachers who were attending the college. At first the services were conducted at 7:30 p.m. on Monday nights, with an average attendance of 13. The second semester of the 1953-54 school year the time for the devotional services, the average attendance increasing to above 23 and a record attendance on one occasion of 39. The second year the church conducted the devotional services, the average attendance grew during one month to 35, with greater interest being shown by all concerned than ever before.

Before the church began meeting it was realized that the frame dwelling house would someday become inadequate for the purposes of the congregation due to its growth. Before six months had elapsed, it was necessary to remove another wall partition to increase the size of the auditorium. This additional space increased the seating capacity by 24, and an additional 25 folding chairs were ordered and placed in service. In the late fall of 1954 definite plans were begun to erect a new meetinghouse.

Various committees were appointed to the different aspects of construction, and every male member of the congregation was placed on one of these committees. James Payne was appointed to head the building committee and eventually, after each of the committees had drawn up specifications and details for their respective parts of the building, Mr. I. H. Key was selected to put the plans together, giving complete plans for the new church building.

It was decided to dispose of the frame dwelling, which served as a temporary meetinghouse, by public auction, and the church received \$410.00 for the building. This amount together with the money received from the sale of the furnace and stoker was placed in the building fund which was already in existence.

The 7th and Poplar Street congregation, when establishing the College congregation, generously offered to contribute \$5,000.00 a

year to be applied toward the regular work and for building purposes, and to continue this contribution until the congregation was self supporting and had a meeting house erected and debt free. Letters were sent to congregations in the immediate area informing them of the work of the College congregation and asking of them whatever assistance they might be able to offer in helping construct the much needed meetinghouse. This response was very gratifying from the standpoint that the church of Christ in Benton sent \$2,000.00, and several smaller contributions were received both from churches and individuals. The College congregation added to its building fund some \$2,000.00 the first year, which together with the funds from 7th and Poplar, Benton and others, gave us a building fund on January 1, 1955 totaling \$11,073.55. In the whole campaign to raise the funds to erect the meetinghouse, not once was a plea made to any individuals or business houses to make contributions, although several of their own volition did so.

Excavation was begun the last week in May, paving the way for the actual construction. Heavy rains held up construction for some 4 or 5 weeks, but by July 1, the footings and basement walls had been poured and orders placed for the steel and brick. In a little over eight months, the new building was completed at a cost of

over \$95,000.00 which includes the lot and finishing for the building.

During the time of construction, the College congregation held its services in the basement of the 7th and Poplar Street church building, with as many as seven services being conducted each Lord's day by both congregations in the building. In this period of time, both congregations remained autonomous, and both grew in attendance and membership. Seventh and Poplar gaining more than the number of members it lost in establishing the College congregation, and it increasing in membership to 130. A complete spirit of fellowship and unity continues to exist between all congregations of the churches of Christ in Murray.

On Sunday, February 5, 1956, the first service was held in the new church building. It was a Bible study period followed by the regular worship services. The regular minister, Ernest Clevenger, Jr. preached the first sermon in the building at the morning hour and again delivered the message at the evening service. The sermon topics were "God's Building, The Church" and "The World's Greatest Invitation". There were 173 present for the Bible study; 260 for the worship service and 130 present for the evening service. At the morning worship hour, Carylon Wood was baptized into Christ, being the first to be baptized in the new building. At the

How Plans For Building Came About

All of the initial planning for the College Church of Christ's new building was done through a building committee composed of most of the male members of the church. James Payne was

evening service, Mrs. Frances Davis identified herself with the College church. This brought the membership of the church at the end of the first day in the new building to 132.

General Chairman, and Vernon Anderson Co-chairman of this group.

The building committee's purpose was to gather ideas about how the new building should be constructed and what should go into the building. The committee was divided into the different aspects of construction and Chairmen appointed to make recommendations about what should be included in the building and how the various parts of the building should be arranged.

There were ten committees within the general Building Committee. The different committees and their chairmen were: Structural Materials, W. H. Brooks; Seating, Vernon Anderson; Windows, Doors and Hardware, Esco Gunter; Basement, Leroy Eldridge; Heating and Cooling, Robert Hendon; Plumbing,

Wayne Williams; Electric, Tulton Turnbow; Baptistery, Ernest Clevenger, Jr.; Building Location, Burton Young; and Roof, Ed Hendon.

After these men completed their work, their recommendations were submitted to the Building Committee Chairman, James Payne, and he then instructed the architect, Mr. I. H. Key, as to what to include in the building and how to arrange it. The front of the building, however, was designed by Mr. Key.

After the building was nearly complete, a Finishing Committee was appointed to select the carpets, paint colors and other finishing items. Wayne Williams, was the Chairman of this committee. The furniture for the classrooms was selected by Esco Gunter, who is the supervisor of the Bible Study program.

Building Has Many New Facilities

For the Bible class periods the new College Church of Christ building has ample facilities. There are eleven classrooms on the basement level, one on the main floor level, and two on the second floor level. There are facilities for at least seven other classrooms, when needed, in the new building.

The main auditorium, the balcony, the library, and two dressing rooms could be used when needed for classroom space. One room in the basement is so arranged that it might be made into two rooms so classroom space is not lacking.

Each classroom has been equipped with proper furniture tailored to fit the size of the various age levels. For the nursery group round tables and chairs are provided. For the kindergarten through eighth grade, tables and benches, or chairs are in the various rooms. Some equipment that has not arrived as yet are the tablet arm chairs for the high school group and the library chairs for that room.

In order that the teachers of the College Church of Christ Bible School may have the best supplementary material available, a library room is provided for them. The room is for use by anyone wishing to use material found there however. For this room,

Old Building Was Torn Down

Here is the College Church of Christ as it was before the new building was constructed. It was the former home of Mrs. Myrtle Walker and is located at the intersection of North Fifteenth and Main Streets. This house was torn down and a modern church building has been constructed on the location.

Tables and chairs of conventional size are found. Shelves are provided which will hold books and magazines as they are added to the library.

BIBLE CLASS TEACHERS

There are some forty Bible class teachers that will be employed in the Bible study program in the new building. Each class will have a teacher and a co-teacher.

Eino Gunter, one of the elders of the congregation, is the Bible School superintendent.

Sunday morning Bible study teachers and co-teachers are listed below by departments.

Beginners Department

Nursery Class: Mrs. Alton Hughes, teacher, Mothers, co-teachers, room 6. Kindergarten: Mrs. Robert Hendon, teacher, Mrs. Macon Blankenship, co-teacher, room 4. Preschool: Mrs. Phillip Murdock, teacher, Mrs. Lester Nanny, co-teacher, room 3. First grade, Mrs. Vernon Anderson, teacher, Mrs. Lester Nanny, co-teacher, room 5. Second grade, Mrs. Hap Brooks, teacher, Mrs. Nettie Suiter, co-teacher, room 7.

Elementary Department

Third grade, Mrs. Leroy Eldridge, teacher, Mrs. Hiram Tucker, co-teacher, room 8. Fourth grade, Mrs. Eino Gunter, teacher, Mrs. James Payne, co-teacher, room 10.

Intermediate Department

Fifth and Sixth grade, Mrs. Scarborough, teacher, Mrs. Dewey Turnbow, co-teacher, room 9. Seventh and eighth grade, Mr. Ed Hendon, teacher, Mrs. Jamie Harrell, co-teacher, room 11.

Senior Department

Ninth through twelfth, Mr. Leroy Eldridge, teacher, Mr. Tommy D. Taylor, co-teacher, room 31.

College Department

Freshmen through Senior, Mr. Vernon Anderson, teacher, Men of class, co-teacher, room 32. Young married, Mr. Ernest Clevenger, Jr., teacher, Men of class, co-teacher, room 2.

Adult Department

Mr. Hamp Brooks, teacher, Mr. Johnny Myers, co-teacher, room 1. Midweek Bible Study Teachers: Nursery, Mrs. Tommy Taylor, teacher, Mothers, co-teachers, room 6.

Kindergarten, Mrs. Bill Boyd, teacher, Mrs. Bob Melugin, co-teacher, room 4.

Pre-school, Mrs. Wayne Williams, teacher, Mrs. Paul Bailey, co-teacher, room 3.

First and second grade, Mrs. Harold Grogan, teacher, Mrs. Burton Young, co-teacher, room 5.

Third and fourth grade, Rozella Williams, teacher, Mrs. Shirley Wilfred, co-teacher, room 7.

Fifth and sixth, Mrs. Leonard Wood, teacher, Mrs. Dewitt Brown, co-teacher, room 8.

Seventh and eighth grade, Mr. Bob Melugin, teacher, Mr. Hardiman Nix, co-teacher, room 9.

Ninth through twelfth grade, Mr. Bill Boyd, teacher, Mr. James Payne, co-teacher, room 11.

College, Mr. Robert Hendon, teacher, Men of class, co-teacher, room 32.

Young Married People, Mr. Wayne Williams, teacher, Men of class, co-teacher, room 2.

Adults, Mr. Ernest Clevenger, Jr., teacher, Elders, co-teacher.

College Church Has Busy Minister

Ernest Clevenger, Jr.

The minister of the College Church of Christ is Ernest Clevenger, Jr. He has been with the College church from its beginning in 1953. The Clevengers lived in Athens, Tennessee where he was the minister of the Ohio Avenue Church of Christ for two years before coming to Murray. Mr. Clevenger's wife is the former Glenda Willoughby of Puryear, Tennessee. They have two children, Ernest Clevenger, III, age 2½ and Elisabeth Anne, age 11 weeks.

Mr. Clevenger is a graduate of David Lipscomb College in Nashville, Tennessee, where he received his B.A. degree in 1951. He has been preaching nearly eight years and the College church is the third congregation he has worked with regularly. The others being in Athens and Lickton, Tennessee. Although many who hear him over the radio think him to be around thirty-six years of age, Mr. Clevenger is actually only twenty-six. When he finds time he likes to hunt or fish and considers our area ideal for either. He also is a Murray State basketball fan.

The Clevengers have their home on Woodland here in Murray.

Among the duties of the minister of the College Church of Christ are the preparation of sermons, conducting training classes, teaching Bible classes, conducting the devotionals for College students, doing personal work and visiting in homes of church members, counseling students at Murray hospital and homes. State, delivering radio messages and writing religious articles. Mr. Clevenger also finds time to perform marriage ceremonies, conduct funerals and visit the sick in the hospital and homes. He says, "A preachers life is a busy one, but I enjoy every minute of it."

We are happy to have had the privilege of serving you during the construction of your new church building.

Program For Students Part Of Work

Part of the work that the College Church of Christ is to have an active program for College students that attend Murray State.

There is the regular devotional period for college students that is held in the little auditorium on Monday's at 12:30 p.m. In this devotional students direct the singing, lead in prayer and some deliver short talks. Such subjects as "The Church," "Christian Recreation" and "Marriage in the Christian Home" are discussed in these devotional meetings.

All college students have been invited to use the Library located in the new meetinghouse, and are encouraged to use the books to be found there.

Nearly two hundred of the Murray State College students are members of the Church of Christ. Some eight gospel preachers are attending the college and they, along with the rest of the students, engage in various activities planned for them by the church, such as preparing radio programs, etc.

Two special classes are conducted each week for college students. One on Sunday morning at 9:30 a.m. and the other on Wednesday night at 7:00 p.m. Vernon Anderson, who is a professor at Murray State, teaches the Sunday morning class and Wayne Williams, soil conservation director for this area, teaches the class on Wednesdays. Although the student program is designed primarily for members of the Church of Christ attending Murray State, all members of the student body are invited to come and participate in the program.

Time Of Services Are Listed

The time of the services to be held in the new College Church of Christ building are as follows:

Sunday's
Bible Study 9:30 a.m.
Worship 10:30 a.m.
Presiding 7:00 p.m.

Monday's
College Devotionals 12:30 p.m.

Wednesday's
Midweek Bible Study 7:00 p.m.
The public is invited to attend of these services.

Plans are now being laid to have some training classes for men, Bible class teachers courses, etc. and when definite arrangements have been made, announcements will be made as to time and place in the new building. The public will be invited to participate in these courses also.

Congratulations

To The

College Church of Christ

I am grateful for the privilege of serving you during the building of your new church building.

Crowded No Longer

The above picture was taken in the College Church of Christ before the new building was constructed. As can be seen, very little space was available for the overflowing congregation. One other small room at one side was also used by the congregation.

The new building has a large auditorium which will comfortably seat the membership.

Statistics On The New Building

Things you'll want to know about the Building.

SIZE: The new building is 58 feet wide and 88 feet-4 inches long and has three levels, basement, main floor and balcony, classrooms and dressing rooms. The auditorium is 56 feet by 56 feet and has 18 feet ceilings. There are eleven classrooms in the basement, one on the main floor, two on the second floor and facilities for at least five others when needed plus the main auditorium which can be used as a classroom. The library, located on the main floor behind the pulpit, may also be used as a classroom. Then there is a nursery, a secretary's office and the minister's study. There are two equipment rooms, both located in the basement, plus several closets in which equipment and supplies may be kept.

CONVENIENCES: There are two electrically cooled water fountains located in the building, one in the basement foyer and the other in the main floor vestibule. There are two men's restrooms in the building, one in the basement and the other adjacent the men's dressing room on the second floor to the left of the pulpit, facing it; and three ladies rest rooms, one in the basement, the south side,

one in the nursery, and one in the ladies dressing room on the second floor, south side. For those who may be hard of hearing, there are six earphones connected to the public address system to aid them. Three are located on each side of the auditorium, in the third row of pews. These phones have handsets that extend to fourteen inches for holding comfort and volume controls for each individual earphone. In order that the main auditorium lights may be turned off for baptisms, weddings, etc. without having to throw a switch for each light, there is an automatic switch that operates all of the auditorium lights from one common switch. By this switch, all lights may be turned off or on easily and at one time in the auditorium.

EQUIPMENT: The building is heated and cooled by two General Electric combination Air Conditioning and Heat Pump units. Each unit has a 15 ton air conditioning capacity and a 52,000 watt heating capacity. Parts or all of the units may be used as conditions in the building require them. There is a 12 KW circulating water heater located under the baptismal tank to keep that water at a constant temperature both summer and winter. An automatic time device turns the flood lights in the front of the building off and on as desired so that the building will be lighted at all times during the week. A 30 watt public address system has been installed which will aid the speakers in the auditorium, furnish sound in the nursery, the vestibule and the little auditorium in the basement. It also will operate the hard of hearing earphones and furnish the power for radio broadcasting from the church building. An extension of the telephone has been placed in the main floor vestibule for emergency and other use.

WARNING TO GOLFERS
OMAHA, Neb. — An Omaha golfer got disgusted when he muffed a putt and threw his putter into the air. It didn't come down. While trying to retrieve it from a tree he fell and broke his shoulder.

Water Fountains Strategically Placed In New Building

There are two Westinghouse electrically operated water fountains located in the new College Church of Christ building. These two fountains, installed for the convenience of worshippers, have been placed in the main floor vestibule and in the basement foyer.

The cooler in the basement has an attachment at the side which is for children. It allows them to get a drink without the aid of their parents.

Both coolers will operate summer and winter, and have a capacity of five gallons each. This will provide all the cold water needed for five to six hundred people.

Packaged Air Conditioning Is Big Feature

The new College Church of Christ building has installed in it equipment for year around air conditioning. Two General Electric combination air conditioning and heating tank unit has been installed, one in the rear of the building, the other in the front of the building. Both on the basement level. Each unit has a 15 ton cooling capacity and a 52,000 watt heating capacity. Parts or all of these units may be used as conditions in the building as related to the outside temperature requires them. One of the units has been installed so that its full capacity is used in the main auditorium, balcony, nursery, and vestibule. The other unit has been installed so that its full capacity or parts of it may be diverted into the classroom section of the building, or into the auditorium as needs may require them.

In order to furnish water to cool the refrigerant as it takes heat from the building there is a forced draft tower located on the outside at the south side of the building. The purpose of his tower is to remove the heat from the water circulated in it, which was taken from the refrigerant condensers.

The office and minister's study is heated and cooled separately from the rest of the building in order that it may be used continually, without having to operate the larger packaged air conditioning units unnecessarily. For this purpose the minister's study has Cell Heat in it and the Office has an Electromode unit in it. Both are cooled by a one-ton Hotpoint air conditioner.

New Building Sound System Is Complete

The public address sound system for the new College Church of Christ meetinghouse is one of the most complete in this area. The system consists of two main speakers, one in the main auditorium and one in the main sanctuary, and three smaller speakers in the main sanctuary and the other in the main auditorium.

There are two twelve inch H.P. speakers in the main auditorium and three eight inch speakers in the main sanctuary. The system is complete in the main auditorium and the other in the main sanctuary.

Aids To First of Year — Located in the third row of seats in the main auditorium are six earphones that have individual volume controls on them. These are for people who are hard of hearing. They are connected to the central sound system and enable those who might not otherwise be able to hear all parts of the service to do so. The earphones have telescopic handles for individual adjustment and comfort.

Three microphones are used in operating the sound system. A dynamic mike which is used for radio work and a lapel mike, which enables a speaker to walk around the pulpit to illustrate a sermon or talk by chart, etc.

The sound system may be controlled from either the pulpit in the main auditorium or from the minister's study. Broadcasting may

New College Church of Christ Building

HERE IS THE NEW CHURCH OF CHRIST BUILDING, which is just completed. The congregation will hold their second service in the new building this Sunday.

Modern in every respect, the building has encompassed within it, all the features that will make it a comfortable and convenient place of worship.

be done from both places also. The public address system and radio outlet was installed by Leonard Wood, of the Wells Electric Shop and by the minister of the church, Ernest Clevenger, Jr.

CHURCH SUE

CLEVELAND, Ohio — Mrs. Lida Melaragno filed a \$50,000 damage suit against a church charging she was injured at a wedding.

She said the church was "negligent" in not cleaning rice off the steps from an earlier wedding, causing her to fall.

TEMPER

DAWSON, Neb. — Burglars became so angry when they failed in their attempt to crack a safe in the Farmers' Union office that they kicked out all the windows in the office. The safe wasn't locked.

ALMOST DEAD

RACINE, Wis. — Bystanders heard a cough from inside a coffin crate at the Racine railroad depot and opened the coffin.

Inside, very much alive, they found William Braddock, 47, who said he had had a few drinks and that was all he remembered.

Sound Proof Nursery Is Featured

For the convenience of mothers with small children, the new meetinghouse of the College Church of Christ has a sound proof nursery located in the rear of the main auditorium. This nursery is reached through a door into the main floor vestibule, which reduces the possibility of excess sound reaching the auditorium during services.

A speaker with a volume control is located on the wall next to the auditorium, where a large window is situated so mothers can still see all parts of the services and participate in them. The location of the speaker gives those who use the nursery the impression that the sound is coming through the glass and it is as if they were right in the auditorium.

Appropriate furniture has been placed in the nursery, a lounge chair and some rocking chairs, as well as a baby bed.

Mothers who attend services at the new church building are encouraged to keep their children in the main auditorium and to use the nursery only when the child can no longer be restrained. The purpose of this nursery is to provide a place for mothers to take their children only when the children cause the grown-ups around them to take their attention from the services. The College Church maintains that the child should be kept in with the audience as much as possible so he will learn what the services are for and how to act at them.

Building To Be Used Extensively

The present plans for the new College Church of Christ building calls for its extensive use. Many of the activities planned will be for this community as well as for members of the College Church.

A Leadership Training Course will begin shortly, and all of the churches of Christ in Calloway County will be invited to participate in it. The purpose of the course will be to train members of the church to make announcements, make short talks, usher, lead singing, lead public prayer, and do many of the other things that they will be called upon to do in public services. The course will last only ten or twelve weeks and then another group will be recruited to take the same instruction.

There will also be a Teacher Course of from six to eight weeks offered. This course will consist of instruction to those who are now teaching a Bible class or those who would like to teach one. The material to be covered will include methods of teaching, use of material helps in teaching, use of the bulletin board and other types of visual aids in teaching and emphasizing the importance of keeping attendance records and building up the Bible class attendance.

Plans for putting more usable books in the library are also developing. Members of the College congregation will be given the opportunity to place in the library books that will be on a "want list". Those books will be of the elementary, encyclopedic, and general reference type, plus a few religious books of a general nature. Others who wish to do so will also be allowed to place volumes that appear on the "want list" in the library. Anyone who wishes to do so is invited to use this library.

Beginning Sunday, February 19 a series of gospel meetings will be conducted in the new meetinghouse. Harry Payne, of St. Petersburg, Florida will do the preaching and James Payne, of Murray, will direct the singing. The two men are brothers. You are invited to attend this meeting at any of the regular Sunday services, or at the daily services held at 7:00 p.m.

ARRANGEMENT OF PULPIT IN NEW BUILDING FINE

In all aspects of the design of the new College Church of Christ meetinghouse the need for good arrangements for weddings, funerals, etc. has been kept in mind.

The rostrum in the main auditorium has the steps leading to it close to the wall to enable flowers to be attractively arranged for funerals, and not block the passageway to the pulpit at the same time. For this same purpose, double doors have been installed at the entrance to the building and the entrance to the auditorium. Ample space between the rostrum and the first row of pews has been left to provide for attractive arrangements at weddings and for the ceremony to be performed at the front center of the auditorium.

The baptistry is located at a raised level over the pulpit, which enables this part of the building to be used without disturbing furniture on the rostrum or in the auditorium. It has its own lights concealed in the ceiling also.

For weddings, baptisms, etc. when it may be desirable that the lights in the auditorium be dimmed or off, there is one central switch that controls them. This eliminated the necessity of cutting a few lights, or a row of lights, off at a time.

The floor of the main auditorium is level, but the rostrum and pulpit have been raised two feet above this level to better enable the audience to see.

TAKES OVER

CLEVELAND, Ohio — An expectant mother rabbit moved into a new gray and pink automobile at a local agency when she found the back door open and the firm had turned the car into a temporary nursery.

Since the bunnies were born, the agency has fed the new family of six and kept the engine running at night to heat the car.

CHUM

WASHINGTON — The Internal Revenue Service received a check on which a taxpayer had printed this notation:

"Dear bank, please give to the order of this feller the (amount was given) this much of our money he's got comin'. We'll drop over in a day or so with another little dab. Shore gits away, don't it?"
